LEAD-LEAK CHECKLIST

Go through this on your own ad before you spend more. Tick every box.

01 Leak 1: Slow or confusing page

- [ ] Open the page on mobile data, not Wi-Fi
- [ ] The offer is clear at first glance, above the fold
- [ ] One main button, and it matches the ad's promise
- [ ] Price or price range in ₹ is visible (or clearly 'on call')
- [ ] Phone number / WhatsApp works when tapped

02 Leak 2: Too many form fields

- [ ] Only ask what you need for the first call (often name + phone)
- [ ] No compulsory fields you never use
- [ ] Form works on mobile and shows a thank-you message
- [ ] You get notified the moment a form is filled

03 Leak 3: Slow replies

- [ ] Instant auto-reply on WhatsApp / DM / form
- [ ] A real person follows up the same day

- [ ] 3-message follow-up plan: right away, next day, day three
- [ ] Every lead is logged in one sheet or CRM

04 Leak 4: A vague offer

- [ ] Says what they get, for whom and the price range
- [ ] One clear reason to act now (real, not fake urgency)
- [ ] Proof is real: reviews, photos, results you can show
- [ ] Ad, page and reply all say the same thing

Rule: fix the leaks first, then raise the budget. More budget on a leaky funnel buys more of the same problem.
