Using AI for content?
EDITING CHECKLIST

Run every AI-assisted post through these 11 checks before you publish.

01 Make it yours

- [ ] Add one real example from your own work
- [ ] Rewrite the opening line the way you'd say it out loud
- [ ] Cut words you'd never use ("unlock", "game-changer", "dive in")
- [ ] Keep one idea per post

02 Make it true

- [ ] Check every number, date and tool feature against a real source
- [ ] Remove any result, client or story that didn't happen
- [ ] Mark AI-generated images where required

03 Make it work

- [ ] The first line says the benefit
- [ ] The hook is different from your last few posts
- [ ] One clear call to action
- [ ] Read it on your phone before posting

Remember: AI is your first draft, not your final post.
