# How does commenting **SEND A DM?**

Set up a Comment → DM automation for your own posts in 5 steps.

## 01 Pick the post and one keyword

- [ ] Choose one word people can type fast, e.g. AI
- [ ] Use the same word on the slide, in the caption and in the automation

## 02 Prepare what you'll send

- [ ] Make the freebie first (PDF, sheet or link)
- [ ] Upload it to Drive and set it to 'Anyone with the link can view'
- [ ] Test the link in a private browser window

## 03 Set up the automation

- [ ] Use a Meta-approved Instagram automation tool (check its current plans and Meta permissions yourself)
- [ ] Connect your Instagram professional account
- [ ] Trigger: comment on a specific post contains your keyword
- [ ] Action: send a DM with a short message and the link
- [ ] Optional: reply publicly to the comment, e.g. 'Sent! Check your DMs'

## 04 Test before you post

- [ ] Comment the keyword from a second account
- [ ] Check the DM arrives and the link opens
- [ ] Fix spelling of the keyword (capital and small letters)

## 05 After it goes live

- [ ] Reply to anyone who asks a question in DMs
- [ ] Send only what you promised, nothing extra
- [ ] Note how many people commented, for your weekly review

**Rule:** only DM people who commented, and only with what the post promised. No spam, no surprise sales pitches.
